

## **Production of Auto Parts in Mexico Grows 2% in 2024, Reaching \$113.199 Billion: INA**

**Mexico City, February 10, 2025.-** The production of auto parts in Mexico reached \$113.199 billion between January and November 2024, marking a 2% increase compared to the same period last year. This growth reflects the strength and competitiveness of the sector, which has expanded by 140% since 2010, consolidating Mexico as a key player in the North American region.

The INA highlighted that Mexico remains the leading supplier of auto parts to the United States, accounting for 43.18% of the country's total imports. For 2025, an additional growth of 3.35% is projected, driven by the strengthening of regional content at 75% under the USMCA, which promotes manufacturing in Mexico and attracts nearshoring investments.

In this context, the INA emphasized its collaboration with the International Finance Corporation (IFC) in the Supplier Development Program (PDP), aimed at enhancing the capacity of Mexican SMEs to integrate into the automotive supply chains. The PDP addresses the historical limitations faced by small and medium-sized enterprises in entering this market by implementing international best practices and successful case studies. This program will strengthen the productive capacities and competitiveness of local suppliers, contributing to the sector's sustainable growth.

The INA reaffirmed its commitment to strengthening Mexico's competitiveness in the global auto parts industry and will continue to work in collaboration with key sector stakeholders to ensure its long-term success. The organization will remain vigilant regarding changes in trade policy, ensuring that Mexico continues to lead in the region.

ante los cambios en la política comercial, asegurando que México siga siendo un líder en la región.
