Maximizing Value: Benefits for Members of the Automotive Parts Manufacturer's Association

2025

What differentiates us

The National Auto Parts Industry Association was founded in 1961 and represents more than **700 auto part manufacturing plants** with operations in Mexico.

We encourage the industry's different players to enter into agreements, discuss problems and propose solutions to them, depending on their level of priority.

We cooperate with government agencies, with a view to promoting national and regional development by growing existing investment and promoting new investment in the auto parts sector.

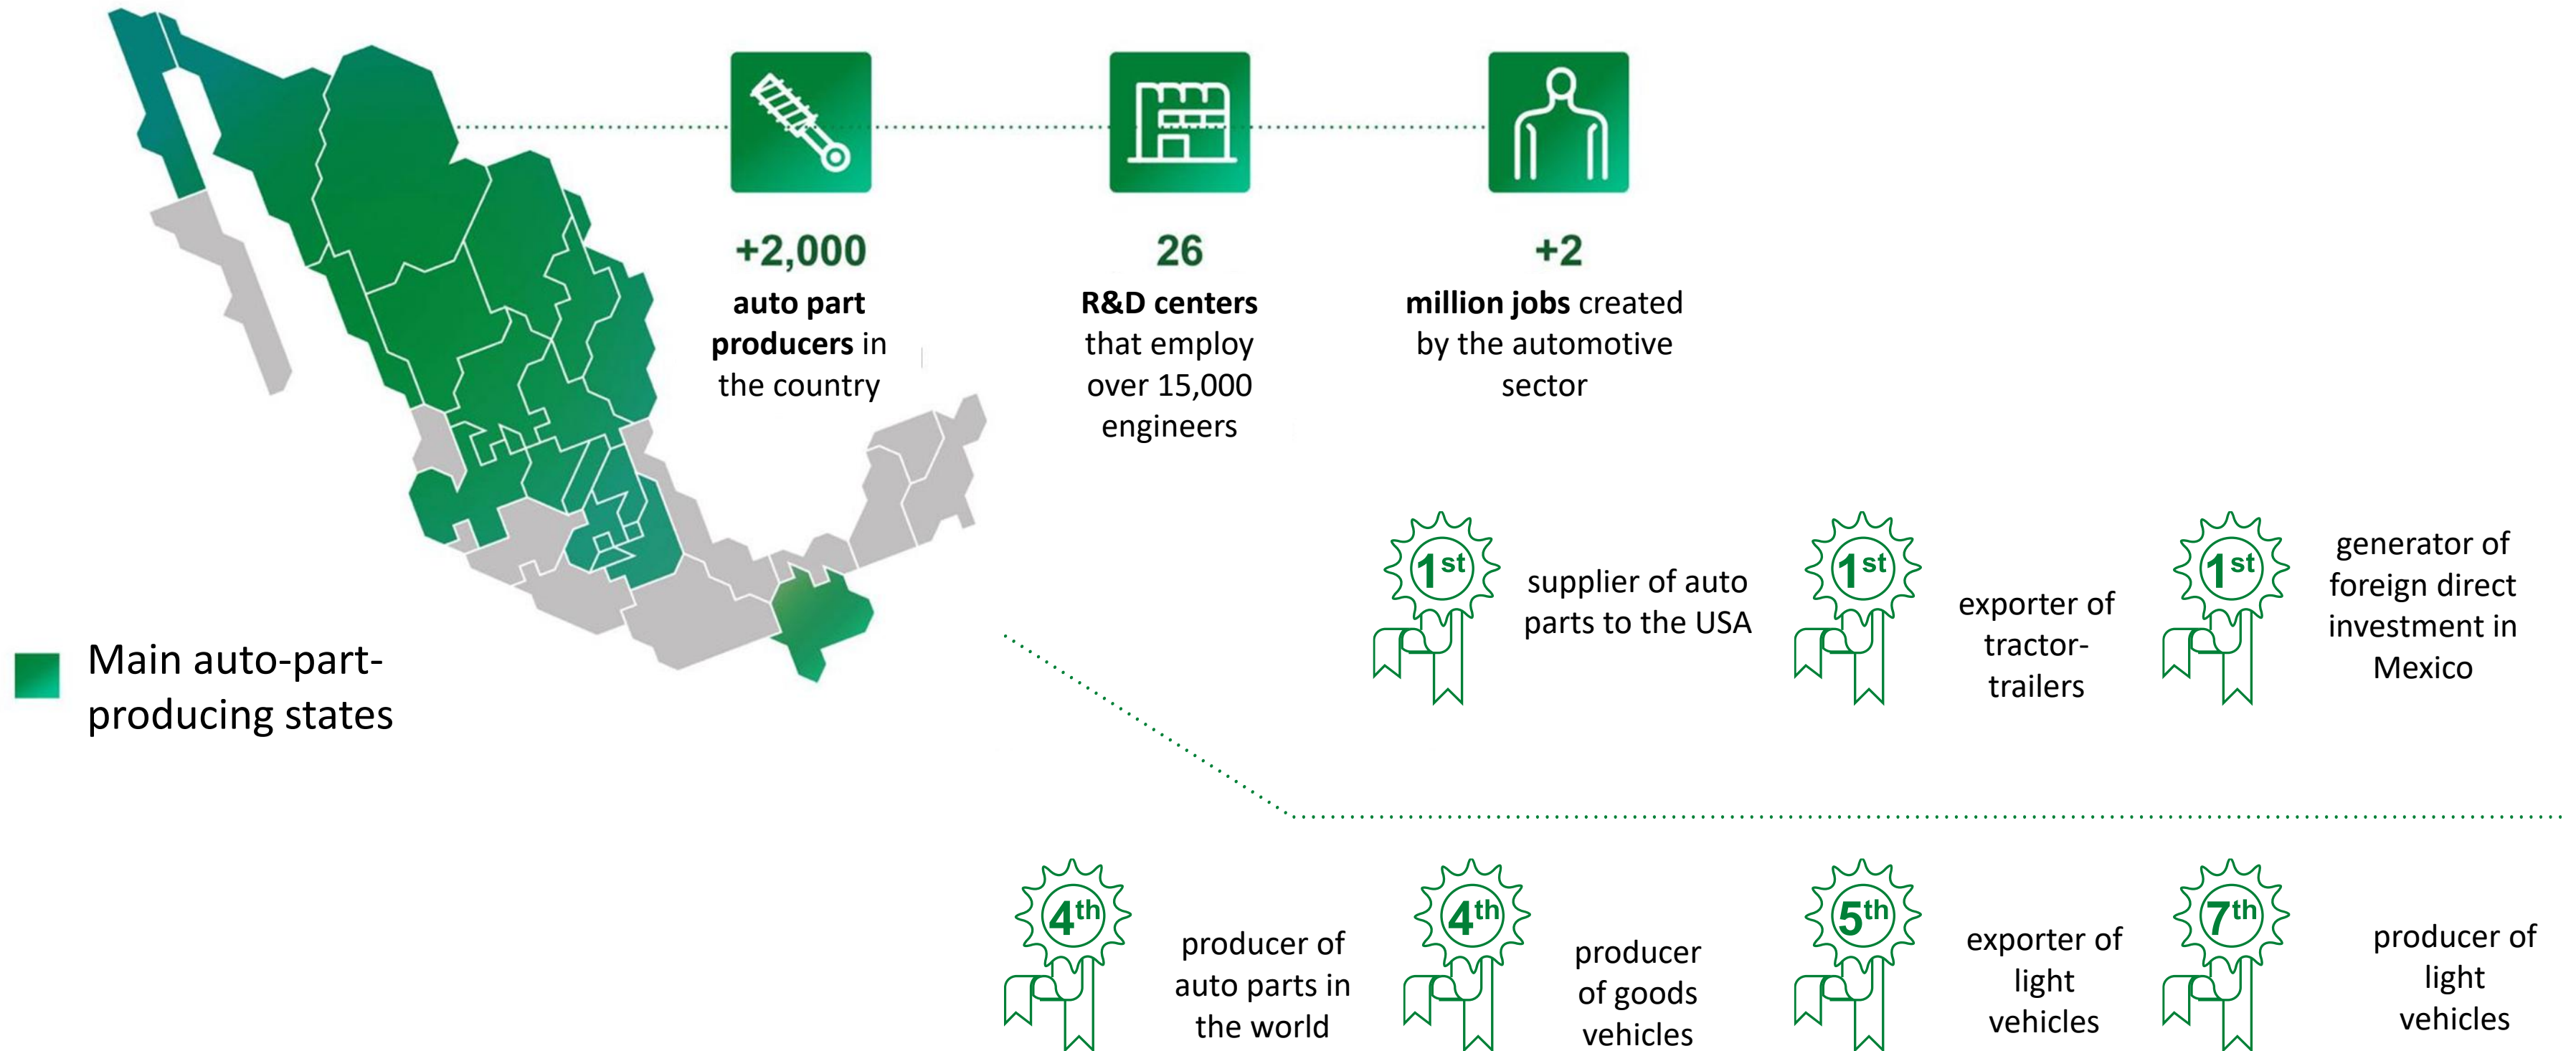

The strategic intelligence we generate analyzes the **technological challenges and opportunities** facing the industry.

Every year, we organize the **International Automotive Industry Congress (CIAM)** and present the **National Automotive Industry Award**, a unique accolade in its genre in Mexico that acknowledges the contributions of the industry's most outstanding actors and companies.

We also coordinate the **largest annual auto parts expo** in Latin America, **INA PAACE Automechanika**, which will feature the first edition of the **International Aftermarket Summit (IAS)** in conjunction with Messe Frankfurt and MEMA.
